

# Personal Device Enrolment Application

## Devices not purchased through the portal

- **Can I purchase the device from somewhere else?** Yes, however it must be the same device and the parent is responsible for all guarantees, warranty, cost and provision of technical support, the purchase of software e.g. full MS Office, virus software, etcetera that add to the cost.
- **I want my child to use a different device that has similar specifications to the Lenovo. Can my child use a different device?** The school's preference is No. There are 2 reasons for this.
  - **1** - This is because it adds considerable workload to our technician. If there were exceptional circumstances it may be considered, however the device would need to meet all technical specifications and a significant set up cost to pay for the additional technical set up would apply. As an example, this cost is approximately \$270 at another local school.
  - **2** - In a class situation, students may be following explicit instructions to perform a task using their device. For primary students, using a different device can add an additional layer of complexity if the device does not have the identical features.

To have a device considered for enrolment into the BYOD program the minimum specifications **must be met**. Sourcing insurance, warranty, guarantees etcetera will be the responsibility of the purchaser. If you are considering a different device, please read the information below carefully. Please contact the office to make an appointment should you wish to have a device considered.

## Personal Device Enrolment Application

\***Request** to add a device (enrolment) purchased outside of School BYOD program to the School network.

\*The device **must** meet these minimum requirements to be considered for enrolment.

### Minimum Requirements

- Touch screen
- Camera
- Battery life of 8 or more hours
- CPU: Intel Core m3-8100Y processor with 3.40GHz or better
- Memory 4GB DDR3
- 120GB+ available hard drive space
- Intel Dual Band Wireless-AC 9260 (2x2, 802.11ac/a/b/g/n)
- Windows 10 Home 64 bit Certified Edition

### What we will do

- Evaluate device for suitability in school environment based on the requirements above
- Create recovery media for restoration of factory image which must be stored in a safe and secure location
- Wipe device
- Install eduSTAR SOE (Standard Operating Environment image) – please see note below 'eduSTAR SOE'.
- Configure device for school network
- Address requests as quickly as possible but School infrastructure and recommended devices take priority attention

### What we will NOT do

- School will **not** backup/transfer documents, pictures, software
- School will **not** perform any hardware repairs to the device
- School will **not** perform troubleshooting for software faults outside of the eduSTAR SOE Upon departure from

Highvale PS, the factory image **must** be restored using the recovery media.

### Cost

- A **non-refundable** charge of **\$50** to evaluate the suitability of the device must be paid before the device is evaluated.
- Should your device be accepted for enrolment onto the School network an **additional** service charge of **\$220**. Payment is required at the School Office prior to connection.
- This covers technician's time and recovery media creation.
- This cost assumes no other major technical issues that may affect the time spent enrolling this device on the school network – these technical issues may incur an extra cost.

### EduSTAR SOE

It is important to note that once a student leaves Highvale Primary School the eduSTAR SOE image will need to be updated depending on the secondary school your child attends. If they attend a government secondary school, the eduSTAR image will continue but may need updating depending on the schools specific image. If attending an independent secondary school we recommend that you speak with the ICT technician as soon as possible to get the new image install as the eduSTAR SOE will expire.
